Portland_ Collection

Portland is a collection of chairs inspired by nature, focused on rose petals.
The soft and sinuous shapes and the thin thicknesses make the chair light and fresh.

Lounge_ Portland

The backrest, in the large and small variants, hangs from the chair like a light rose petal, enveloping and stable at the same time.

Wood_ Portland

The collection comes in several variants, with large or small backrest, in wood or upholstered.

Stool_ Portland

There are a series of bases that make the chairs adaptable to all types of environments, from home to contract and modern offices.

Textile_ Portland

The collection is completed by upholstered chairs with contemporary fabrics.
